# 1. Getting Started

The **Mizu Theme Documentation** will guide you through how to install and customize **Mizu Theme**.

It is written in a **tutorial style** so you can follow it from beginning to end. If you are already familiar with WordPress and WooCommerce, then you can skip to the relevant sections.

## 1.1. Requirements

**Mizu Theme for Luxury Fashion** requires a working WordPress installation with the WooCommerce plugin installed. **Mizu Theme is currently compatible with WooCommerce versions 9.4 and above.**

If your current store uses an older unsupported version of WooCommerce, but you would still like to use **Mizu Theme for Luxury Fashion**, [please contact our support team](#) and we'll see what we can do for you.

If you haven't already installed WordPress, you can find instructions on how to install the latest version here: [How to install WordPress](#).

## 1.2. Installation

To install **Mizu Theme for Luxury Fashion**, do the following:

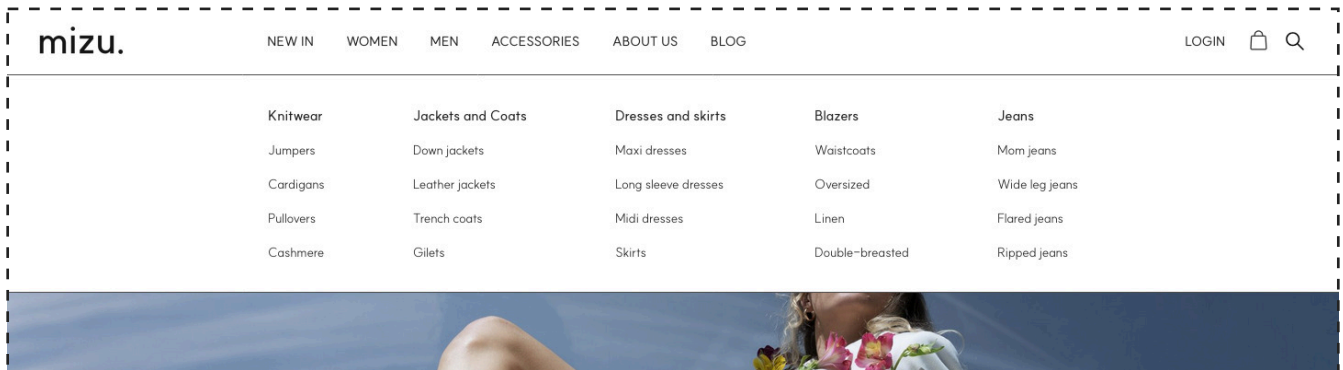

1. Go to the **Downloads** page on your **WooCommerce.com** account.
2. Click the **DOWNLOAD** link next to **Mizu Theme for Luxury Fashion** to save the **mizu.zip** file to your preferred folder.
3. Visit your site's **Dashboard**.
4. Navigate to **Appearance > Themes**.
5. Click on the **Add Theme** button at the top of the page.
6. Click on the **Upload Theme** button at the top of the page.
7. Click on the **Browse** button and select the **mizu.zip** file you downloaded in step 2.
8. Click on the **Install Now** button. You should be redirected to a screen that says 'Theme installed successfully'.
9. Click on the **Activate** button.

Now when you visit your site, it should be using **Mizu Theme**.

# 2. Customizing Your Shop

In this section, you will learn how to configure each part of Mizu Theme for Luxury Fashion. Everything will be customized through your site's Dashboard.

## 2.1. The Header

### 2.1.1. Editing the Logo

To edit the **Logo** of your site, do the following:

1. Navigate to **Appearance > Customize** from the **Dashboard**.
2. Click on the **Site Identity** section.
3. Locate the **Site logo** setting.
4. Click on the **Select image** button and choose your **Logo image**.
5. Enter a height in pixels in the **Desktop logo height (px)** field.
6. Enter a height in pixels in the **Mobile logo height (px)** field.
7. Click on the **Publish** button at the top of the Customizer.

**NOTE** If you don't see your changes, you may need to **refresh** the page.

### 2.1.2. Adding Menu Items to the Navigation Bar

To add menu items to the **Navigation Bar (Navbar)**, do the following:

1. Navigate to **Appearance > Customize** from the **Dashboard**.
2. Click on the **Menus** section.

3. Click on the **Create New Menu** button.
4. Type a menu name in the **Menu Name** field.
5. Under **Menu Locations**, select the locations where you want your menu to display. For example, if you want your menu to display in the **Navbar** and **Mobile Side Menu**, select the **Main Menu** location.
6. Click on the **Next** button.
7. Click on the **Add items** button.
8. Select all the **Menu items** you want to add to your menu.
9. Reorder the menu items by dragging them up or down. If you want to create a submenu item, drag the menu item over the desired parent menu item.
10. Click the **Publish** button at the top of the Customizer when you are finished.

If you added your menu to the **Main Menu** location, you should see the menu items in the **Navbar** on desktop computers and in the **Mobile Side Menu** on mobile devices.

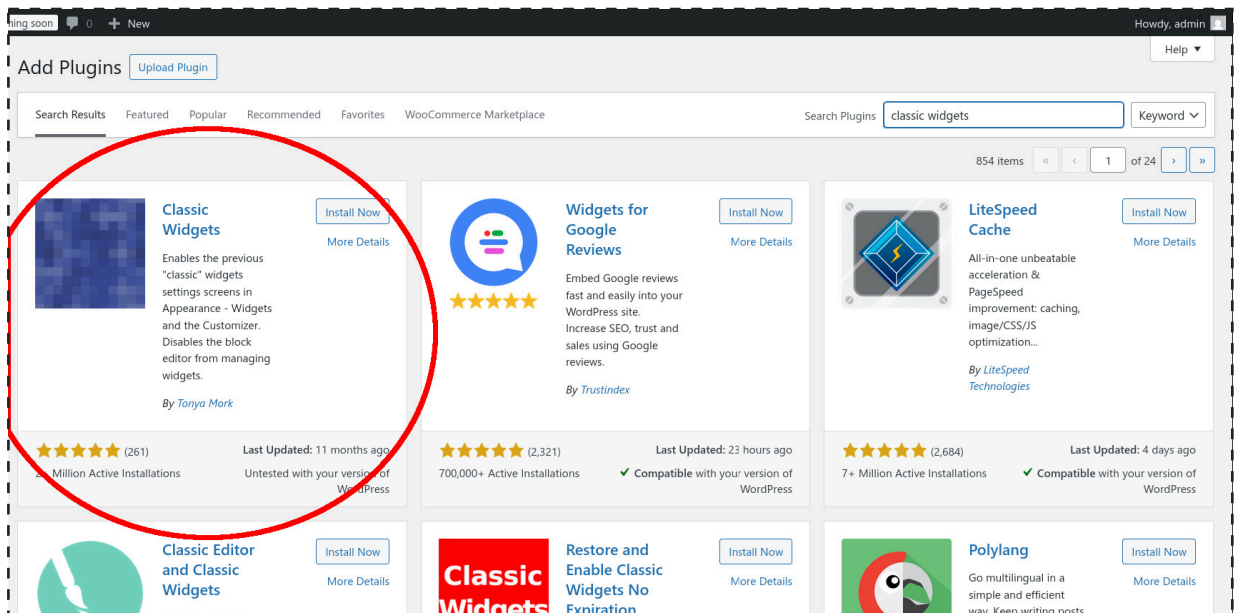

**NOTE** Mizu Theme will display menu items up to three levels deep.

### 2.1.3. Adding a Product Search Field

To add a Product Search field to the header of your store, you will need to use the **Legacy Product Search** widget. To use WordPress/WooCommerce Legacy Widgets, you will need to install the [Classic Widgets](#) plugin from the **WordPress Plugin Directory**.

To install the **Classic Widgets** plugin, do the following:

1. Navigate to **Plugins > Add Plugin** from the **Dashboard**.
2. Search for **"classic widgets"** in the search bar.
3. Locate the **Classic Widgets** plugin.

4. Click on the **Install Now** button.
5. Click on the **Activate** button once it is installed.

To add the **Legacy Product Search** to the desktop **Navbar**, do the following:

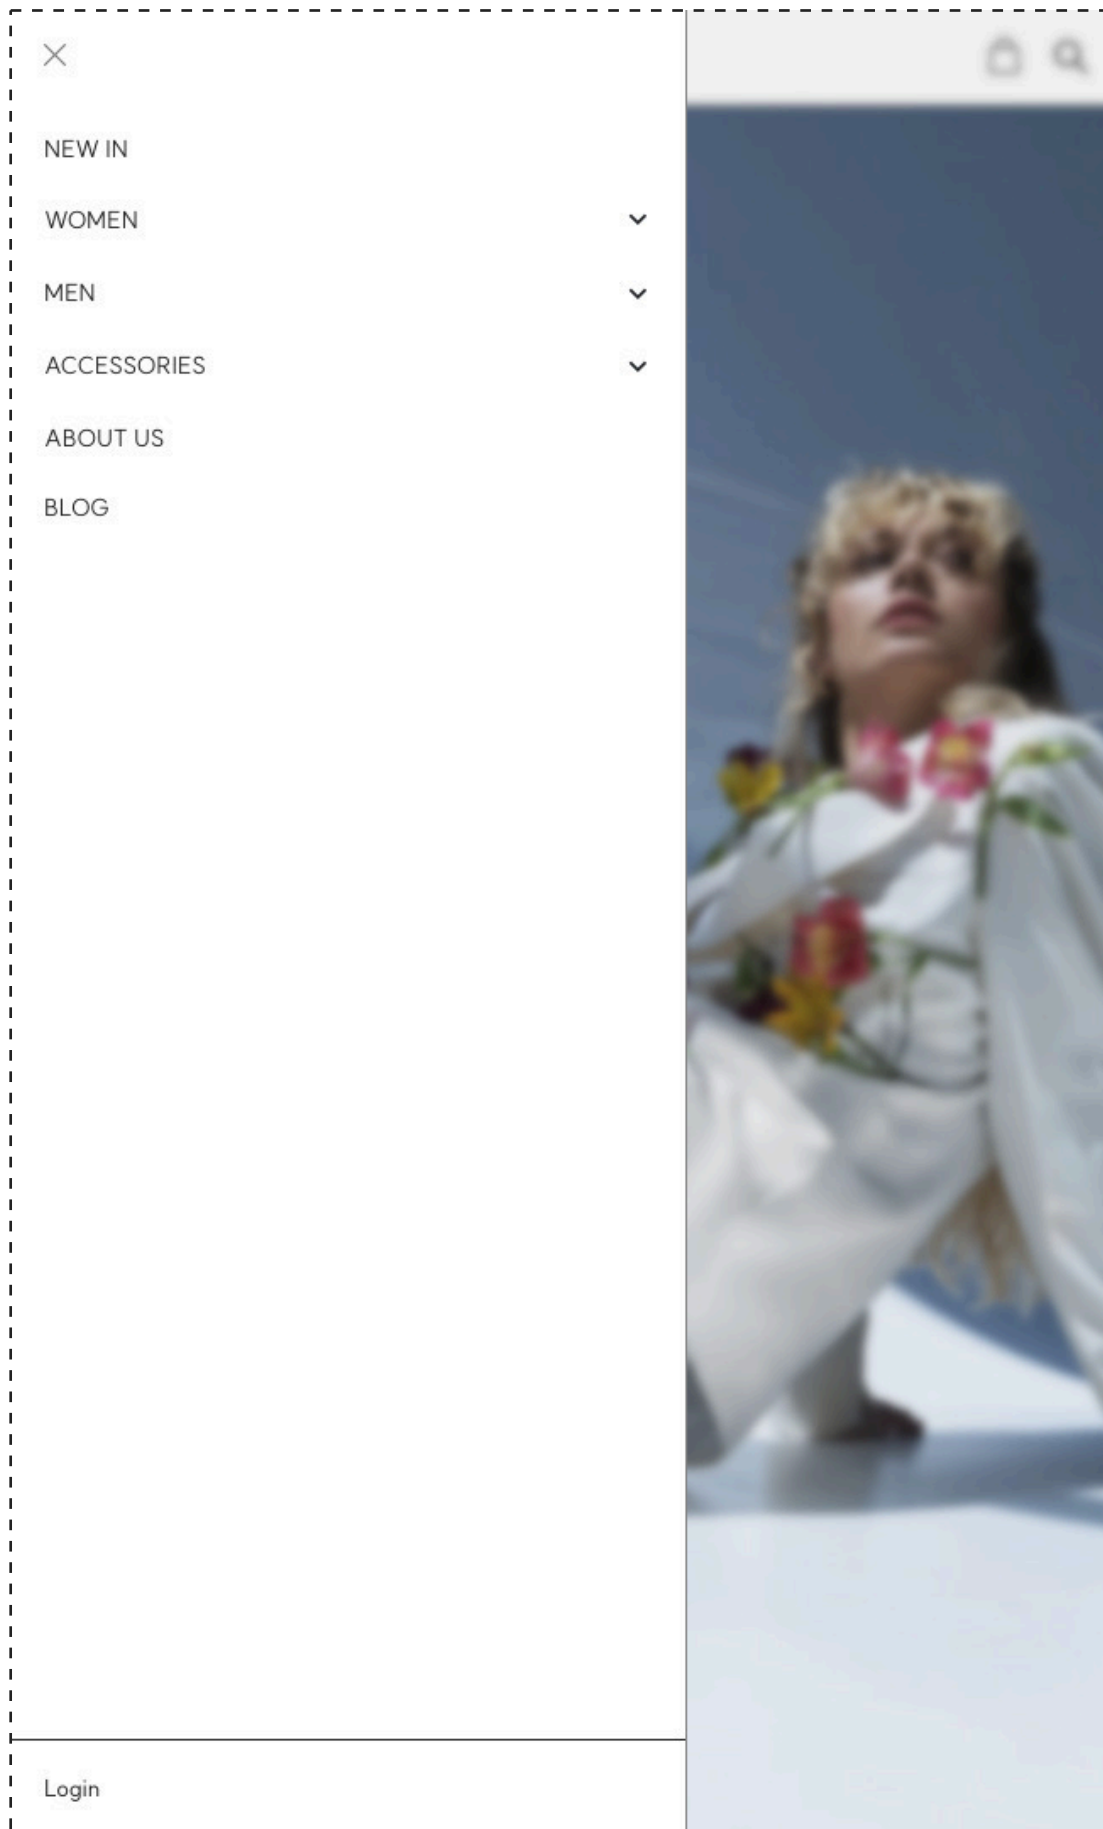

1. Navigate to **Appearance > Widgets** from the **Dashboard**.
2. Locate the **Product Search** widget and click on it.
3. Select **Top Nav Search** from the dropdown.
4. Click on the **Add Widget** button.

The desktop **Navbar** should now display a **Search icon**. When you click on the Search icon a **Search box** should appear below.

#### IMPORTANT

When you activate the **Classic Widgets** plugin, the **Gutenberg Blocks** options will no longer be available in the Customizer. Therefore, we recommend that you **Deactivate** the **Classic Widgets** plugin after you have completed the above steps.

## 2.2. The Mobile Side Menu

## 2.2.1. Adding Menu Items to the Mobile Side Menu

To add menu items to the Mobile Side Menu, refer to [Adding Menu Items to the Navigation Bar](#).

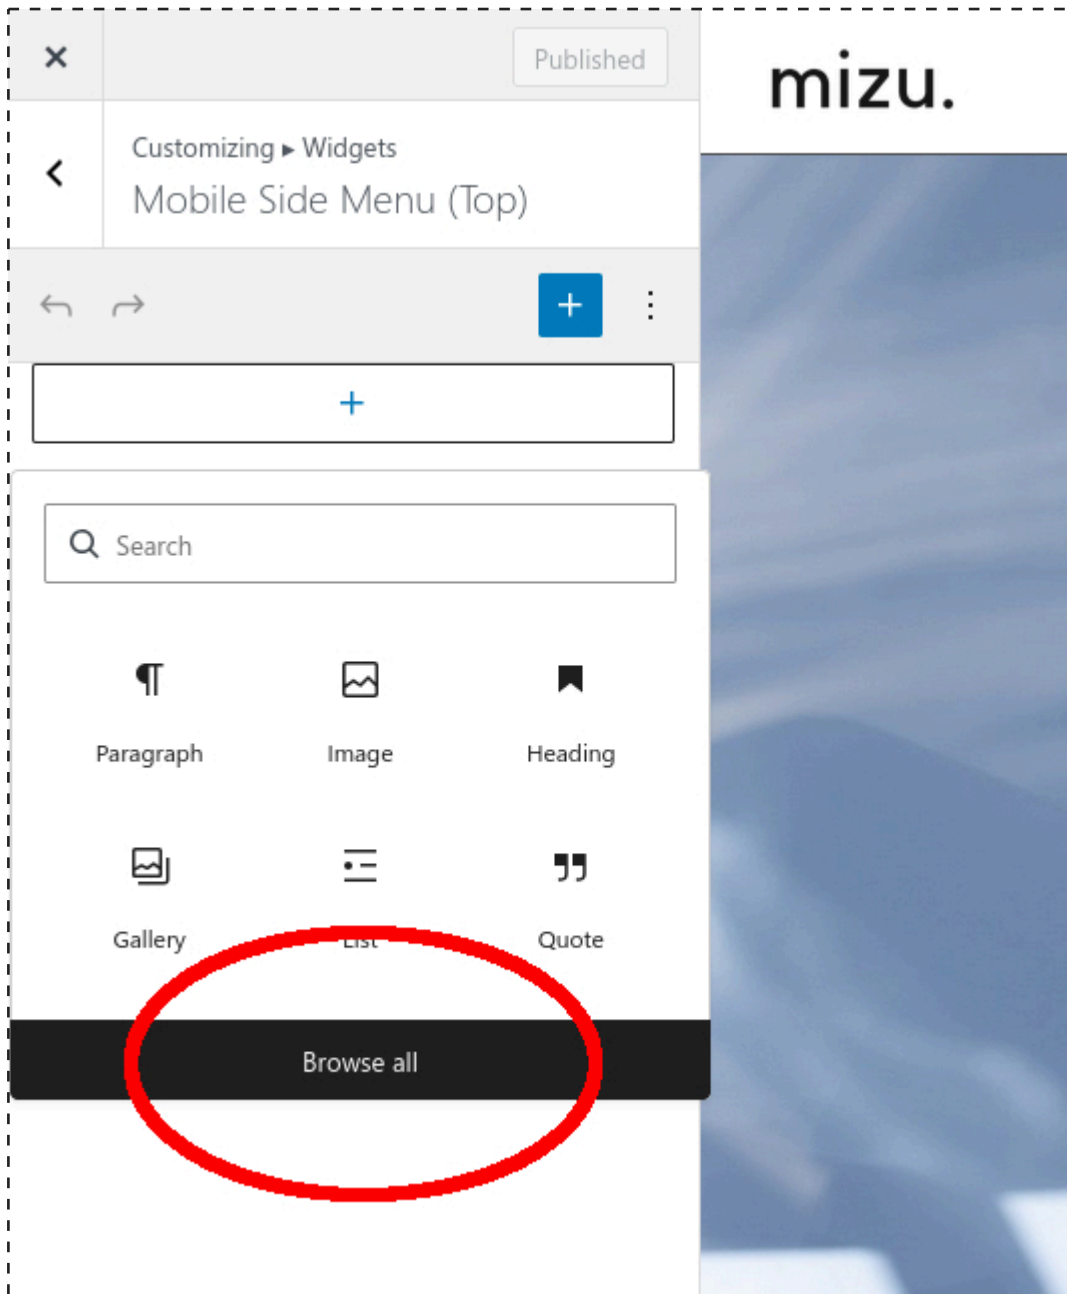

## 2.2.2. Adding WordPress Blocks and Widgets to the Mobile Side Menu

In Mizu Theme the **Mobile Side Menu** has three widget areas:

- **Mobile Side Menu (Top)**
- **Mobile Side Menu (Middle)**
- **Mobile Side Menu (Bottom)**

To add WordPress **Blocks** and **Widgets** to these widget areas, do the following:

1. Navigate to **Appearance > Customize** from the **Dashboard**.
2. Click on the **Widgets** section.
3. Select the **Widget area** that you want to customize.
4. Click on the **+ icon** and click **Browse all**. You should now see a selection of blocks to choose from.

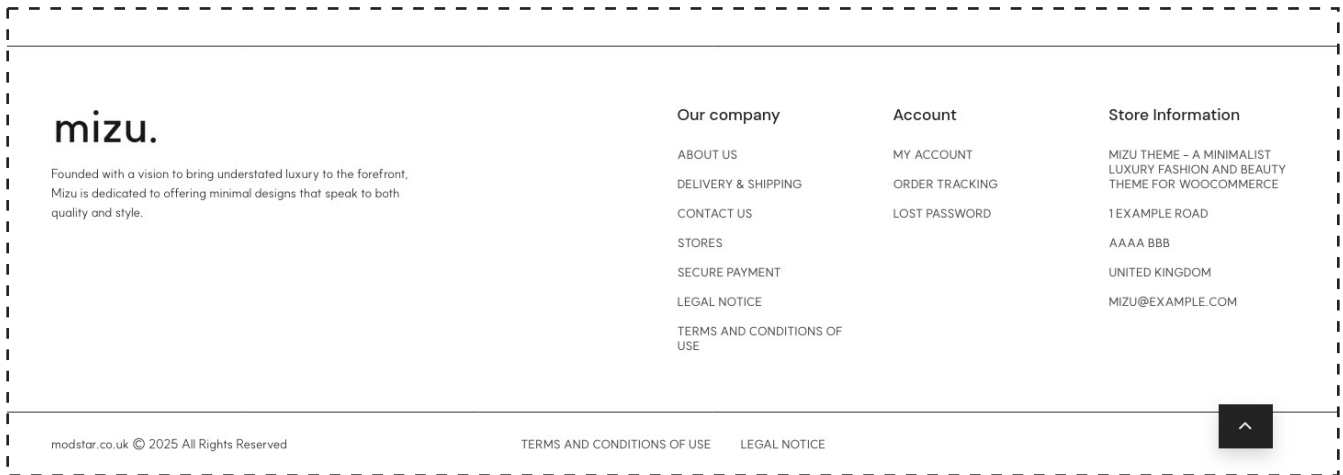

5. Select the **Blocks** you want to add to the **Widget area**.
6. Click on the **Publish** button at the top of the Customizer once you're finished.

**NOTE**

If you can't see a selection of **Blocks** and can only see a list of **Legacy Widgets**, you will need to deactivate the **Classic Widgets** plugin.

## 2.3. The Footer

### 2.3.1. Customizing the Block Footer

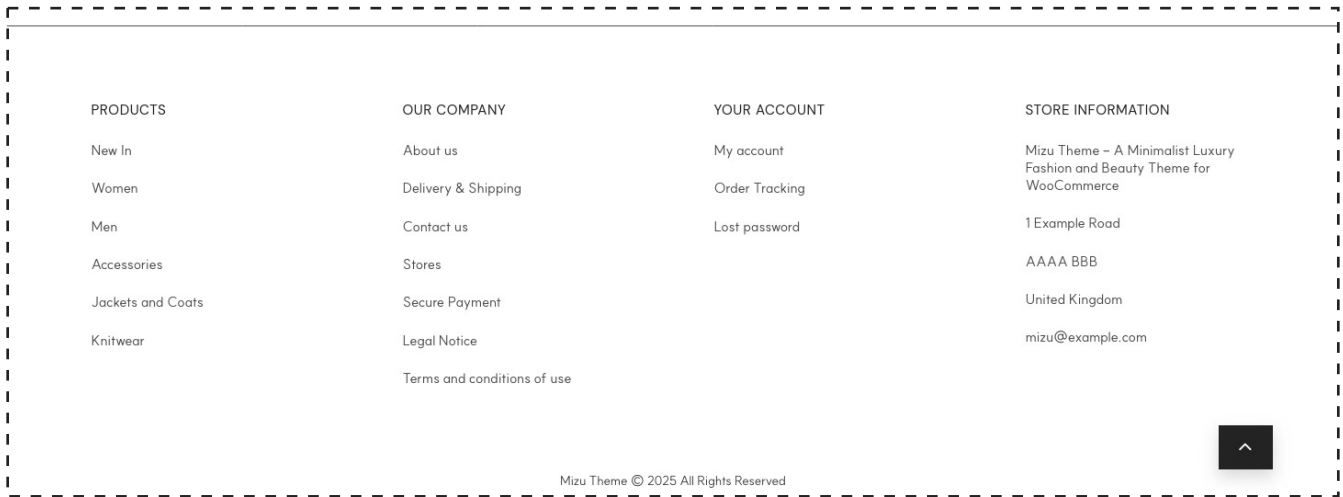

By default, Mizu Theme uses a **Block Footer**, which you can completely customize using the **WordPress Block Editor**.

To customize the **Block Footer**, you will need to edit the **Footer Template Part** by doing the following:

1. Navigate to **Appearance > Design** from the **Dashboard**.
2. Click on the **Patterns** section.
3. Click on the **All template parts** section.
4. Find the **Footer** template part and click on it.
5. Customize the template part to your liking using the **WordPress Block Editor**.
6. Click on the **Save** button in the top right corner once you're finished.

You can find more information about how to use the **WordPress Block Editor** here: [WordPress Editor Tutorial](#).

## 2.3.2. Switching to the Classic Footer

Mizu Theme offers the option to use the **Classic Footer** if you prefer the simplicity of the **WordPress Customizer**.

To use the **Classic Footer**, do the following:

1. Navigate to **Appearance > Customize** from the **Dashboard**.
2. Click on the **Block Settings** section.
3. Tick the **Enable block footer** checkbox.
4. Click on the **Publish** button at the top of the Customizer.

## 2.3.3. Adding Menus to the Classic Footer

In Mizu Theme, the **Classic Footer** can display **four different menus** by utilizing the four available menu locations:

- **Footer menu 1**
- **Footer menu 2**
- **Footer menu 3**
- **Footer menu 4**

To learn how to add menu items to these menu locations, refer to [Adding Menu Items to the Navigation Bar](#).

## 2.3.4. Adding WordPress Blocks and Widgets to the Classic Footer

Mizu Theme provides two widget areas in the Classic Footer:

- **Footer Top**
- **Footer Info**

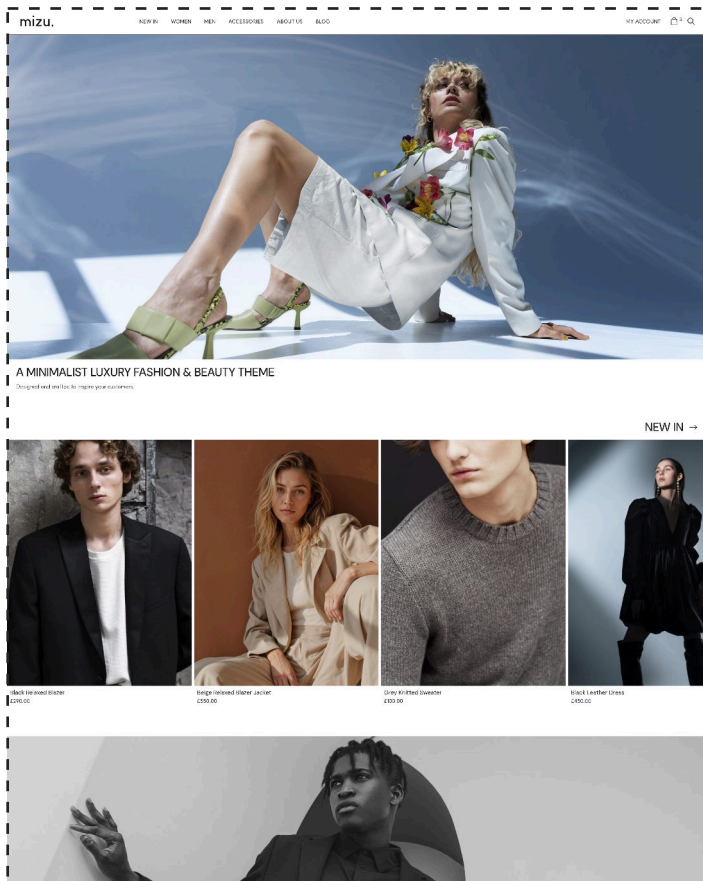

To learn how to add WordPress **Blocks** and **Widgets** to these widget areas, refer to [Adding WordPress Blocks and Widgets to the Mobile Side Menu](#).

## 2.3.5. Changing the Copyright Text in the Classic Footer

If you want to change the **Classic Footer Copyright Text**, do the following:

1. Navigate to **Appearance > Customize** from the **Dashboard**.
2. Click on the **Site Identity** section.
3. Enter your copyright text in the text field under the **Copyright Text** label.
4. Click on the **Publish** button at the top of the Customizer.

## 2.4. The Home Page

### 2.4.1. Configuring the Homepage

To display the **Homepage**, you will need to configure it by doing the following:

1. Navigate to **Pages > Add Page** from the **Dashboard**.
2. Type **"Homepage"** in the **Add title** text box.
3. Click on the **Publish** button in the top right corner of the screen.
4. Return to the **Dashboard** by clicking on the **WordPress logo** in the top left corner of the screen.
5. Navigate to **Appearance > Customize** from the **Dashboard**.
6. Click on the **Homepage Settings** section.
7. Select the **A static page** radio button under the **Your homepage displays** label.
8. Click on the dropdown under the **Homepage** label and select **Homepage**.
9. Click on the **Publish** button at the top of the Customizer.

Now when you first visit your website, it should look like the screenshot below:

**NOTE**

If the Homepage displays an empty page, do the following:

1. Navigate to **Pages** from the **Dashboard**.
2. Hover over the **Homepage** page you created.
3. Click on the **Quick edit** button.
4. Change the **Slug** field to **"homepage"**.
5. Click **Update**.

## 2.4.2. Customizing the Homepage Design

To customize the **Homepage**, you will need to edit the **Home** template part by doing the following:

1. Navigate to **Appearance > Design** from the **Dashboard**.
2. Click on the **Patterns** section.
3. Click on the **All template parts** section.

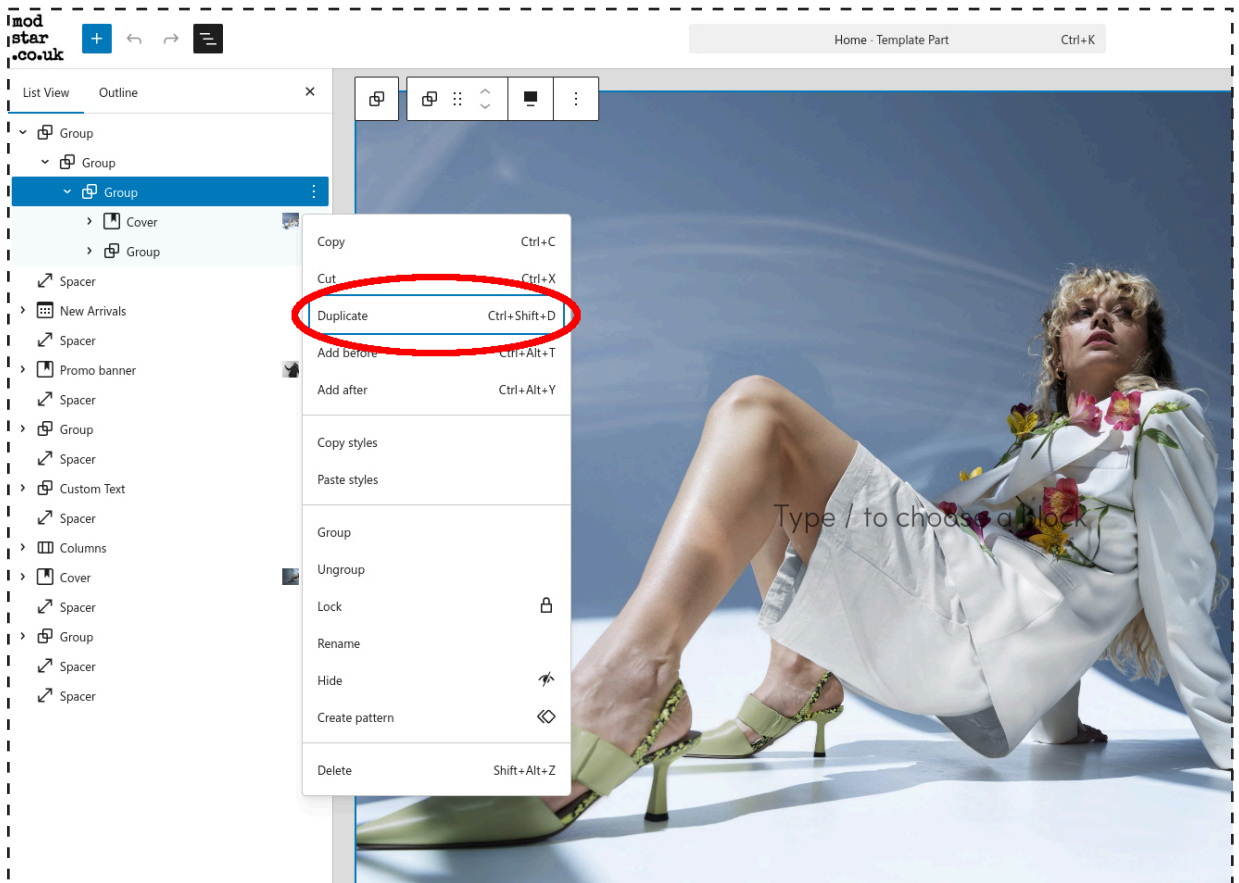

4. Find the **Home** template part and click on it.
5. Customize the page to your liking using the **WordPress Block Editor**.
6. Click on the **Save** button in the top right corner once you're finished.

You can find more information about how to use the **WordPress Block Editor** here: [WordPress Editor Tutorial](#).

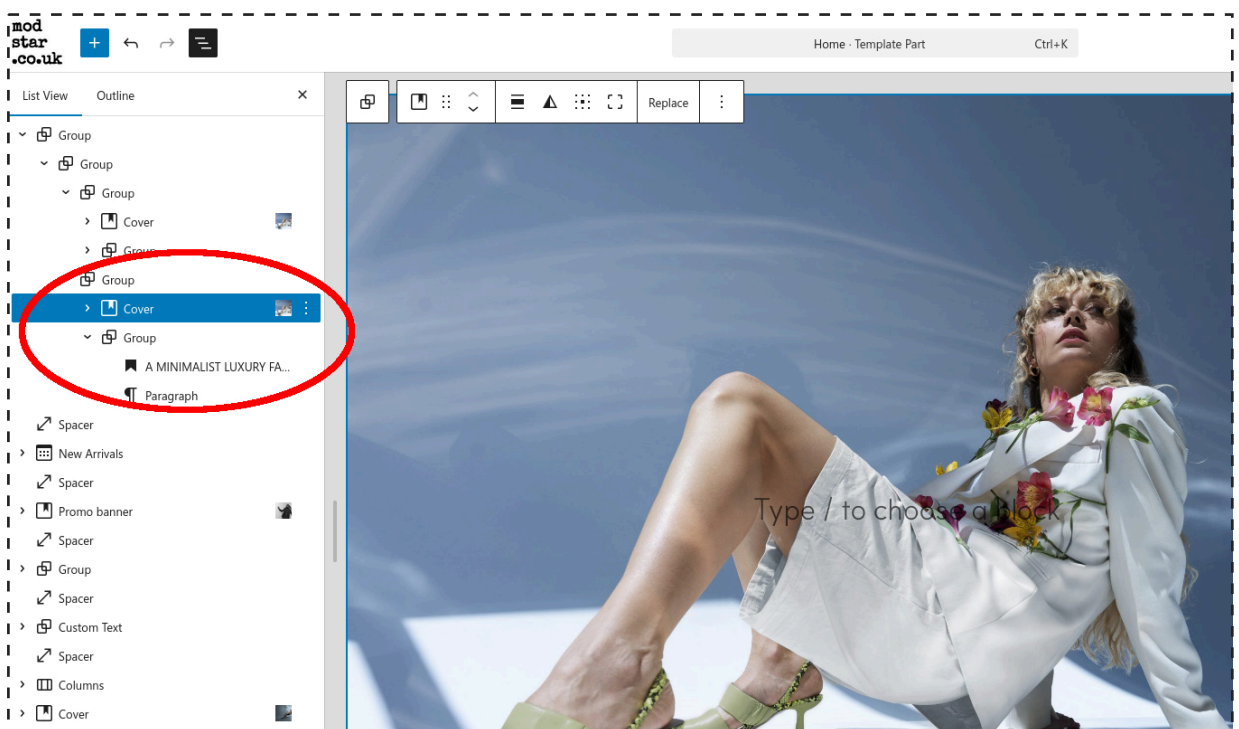

### 2.4.3. Adding Slides to the Main Banner

The **Main Banner** will turn into a slideshow if you add more than one slide. To add a new slide, do the following:

1. Navigate to **Appearance > Design** from the **Dashboard**.
2. Click on the **Patterns** section.
3. Click on the **All template parts** section.
4. Find the **Home** template part and click on it.
5. Open the **Document Overview** side menu by clicking on the button with **three horizontal lines** in the top left corner of the page.
6. On the **List View** tab, unfold the **Group blocks** at the top of the list of blocks until you locate the **Cover block**.
7. Once you locate this **Cover block**, hover over the **Group block** directly above it and click the button with **three dots**.
8. Click **Duplicate** to create your second slide. Repeat this step to create as many slides as you need.

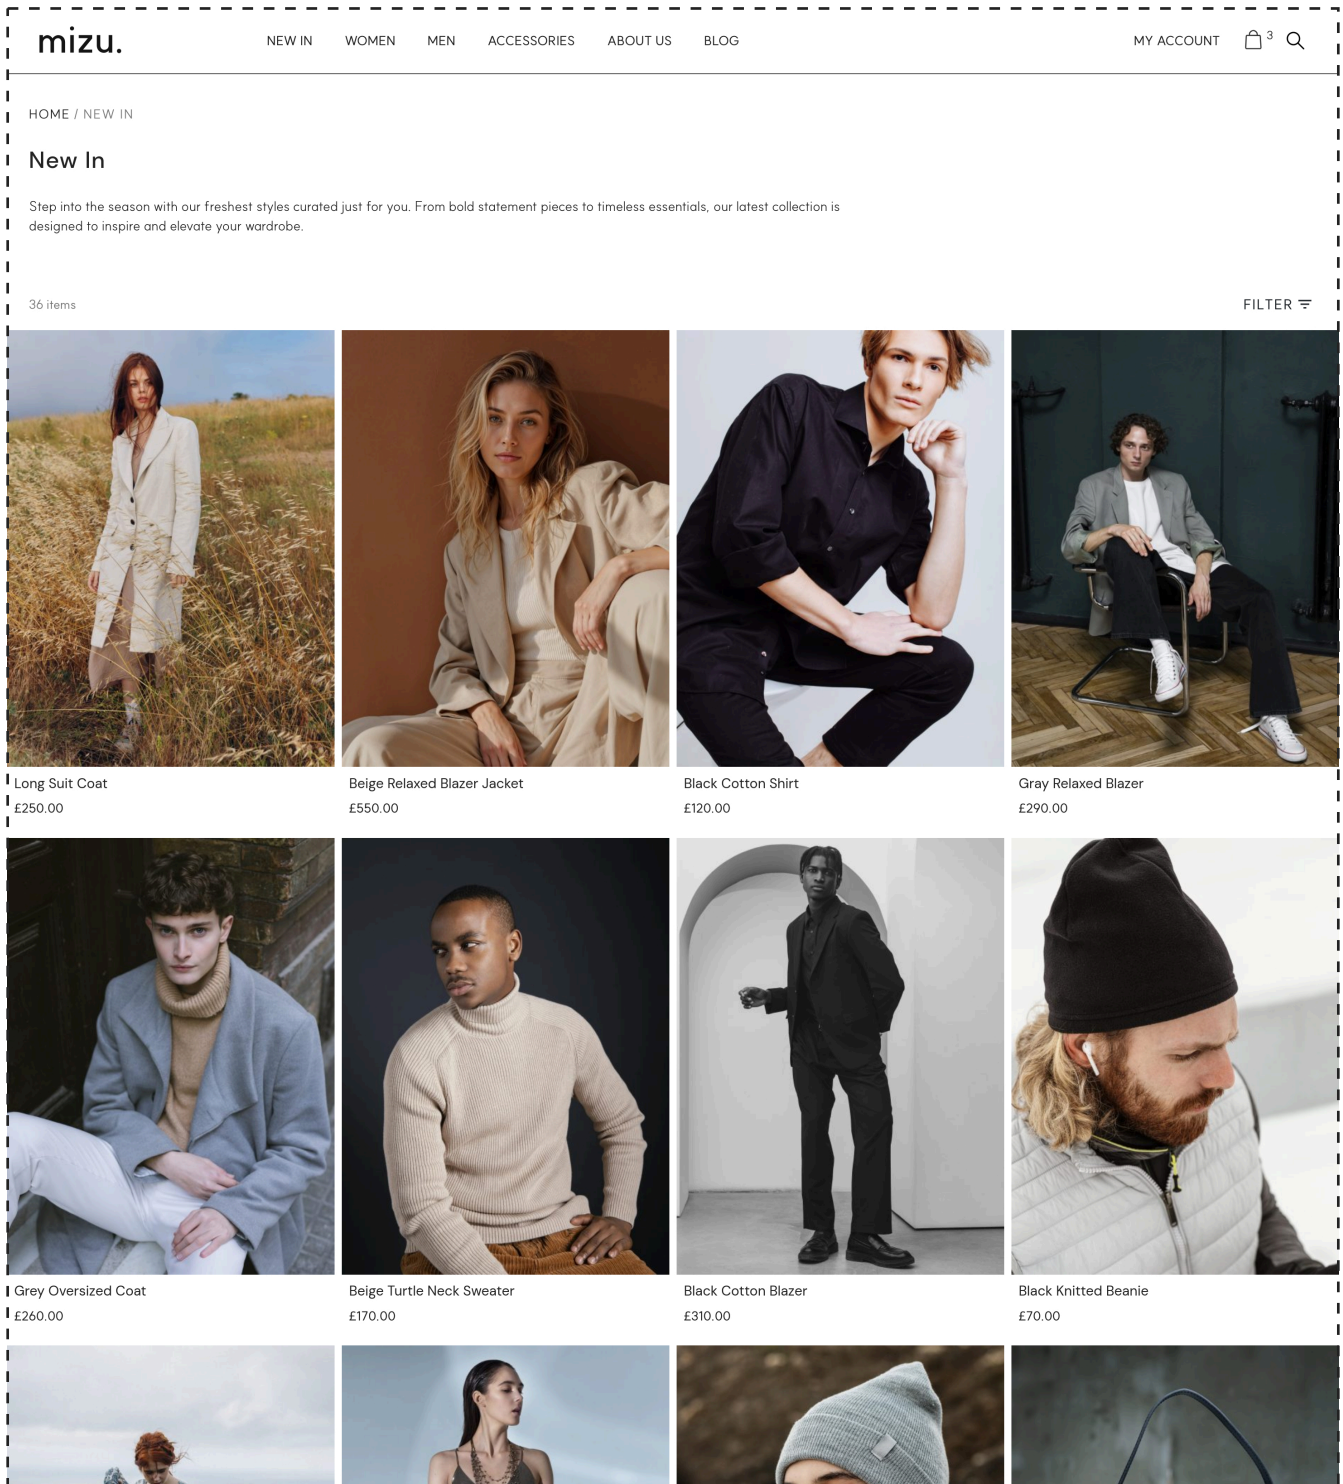

9. Unfold the newly created **Group block** and edit the content to your liking.

10. Click on the **Save** button in the top right corner once you're finished. You should now be able to swipe through the slides you added to your **Main Banner** when you visit your **Homepage**.

# 2.5. The Category Page

## 2.5.1. Changing the Product Image Sizes

To change the Product Image Sizes, do the following:

1. Navigate to **Appearance > Customize** from the Dashboard.
2. Click on the **WooCommerce** section.
3. Click on the **Product Images** section.

4. Change the **Main image width**, **Thumbnail width** and **Thumbnail cropping** settings.
5. Click on the **Publish** button at the top of the Customizer once you're finished.

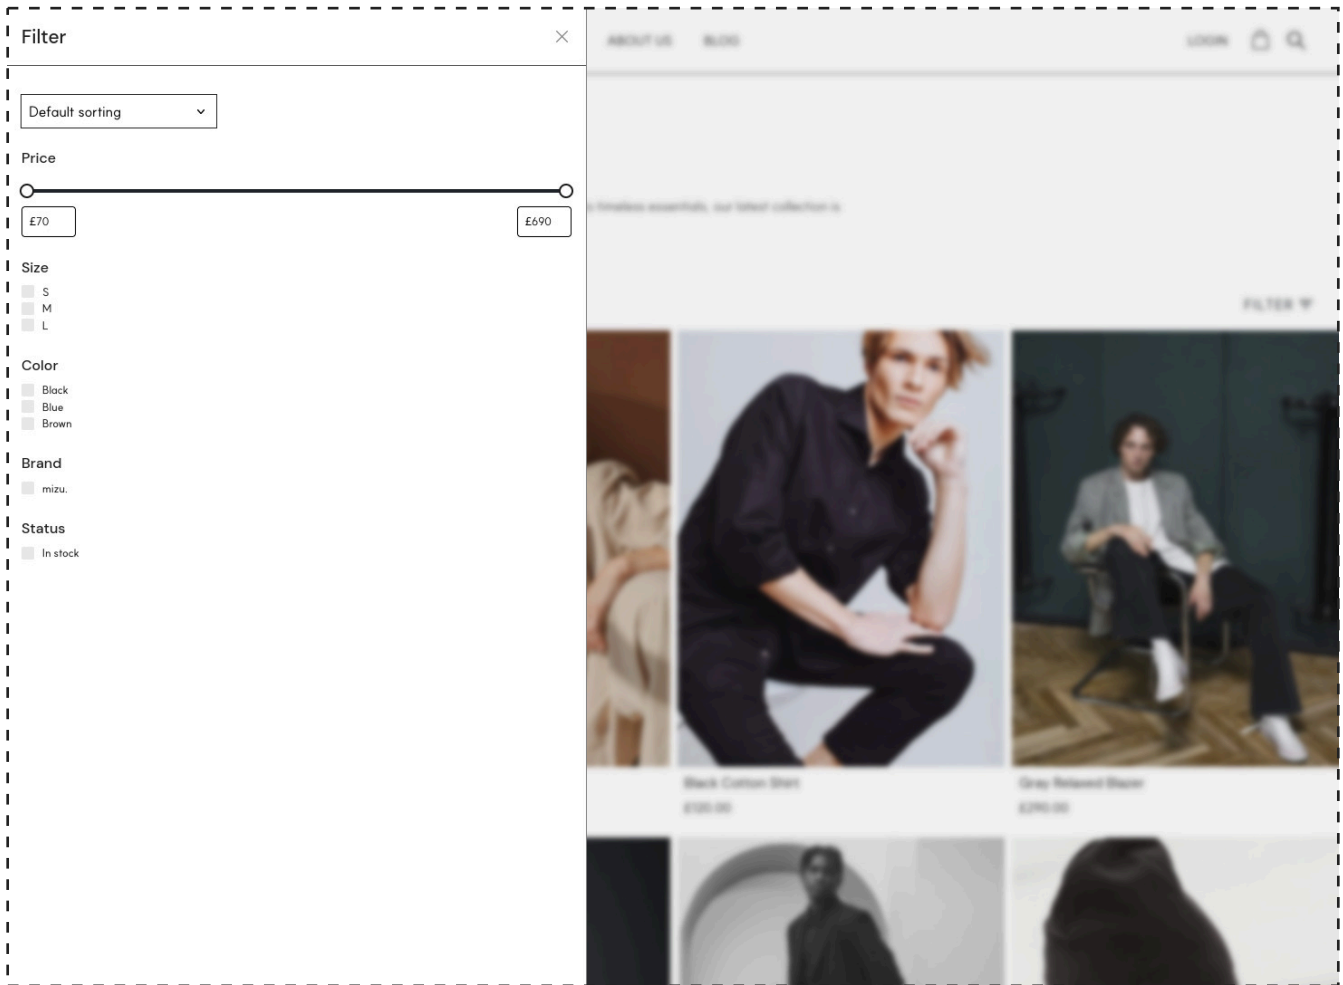

## 2.5.2. Changing the Product Catalog Pagination Settings

To change the Product Catalog Pagination Settings, do the following:

1. Navigate to **Appearance > Customize** from the Dashboard.
2. Click on the **WooCommerce** section.
3. Click on the **Product Catalog** section.
4. Change the **Products per row** and the **Rows per page** settings.
5. Click on the **Publish** button at the top of the Customizer once you're finished.

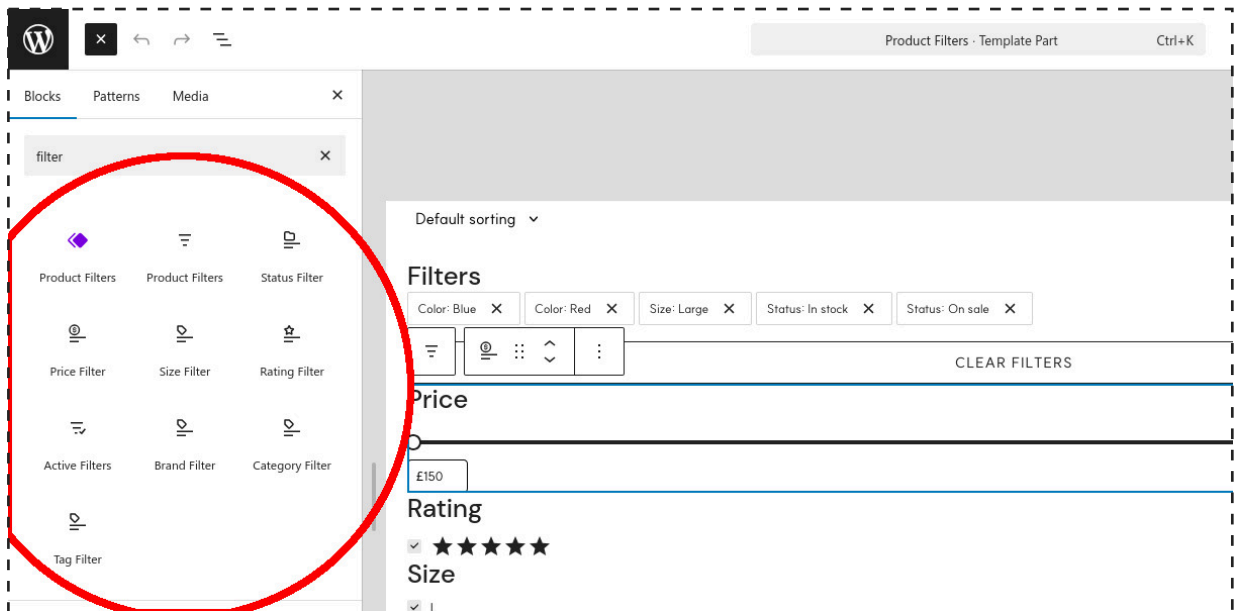

**NOTE** If you don't see your changes, you may need to **refresh** the page.

## 2.5.3. Customizing the Filter Menu

To add, remove, or style the **Product Filters**, do the following:

1. Navigate to **Appearance > Design** from the **Dashboard**.
2. Click on the **Patterns** section.
3. Click on the **All template parts** section.
4. Find the **Product Filters** template part and click on it.
5. Click on the **+** icon in the top left corner of the editor to add more filters.
6. Select one of the filters that are already displayed e.g. the **Price filter**.
7. Type **"filter"** into the search box. You should now see a selection of different **Filter blocks**. If you can't see a list of different filter blocks, check the **NOTE** at the end of this section.

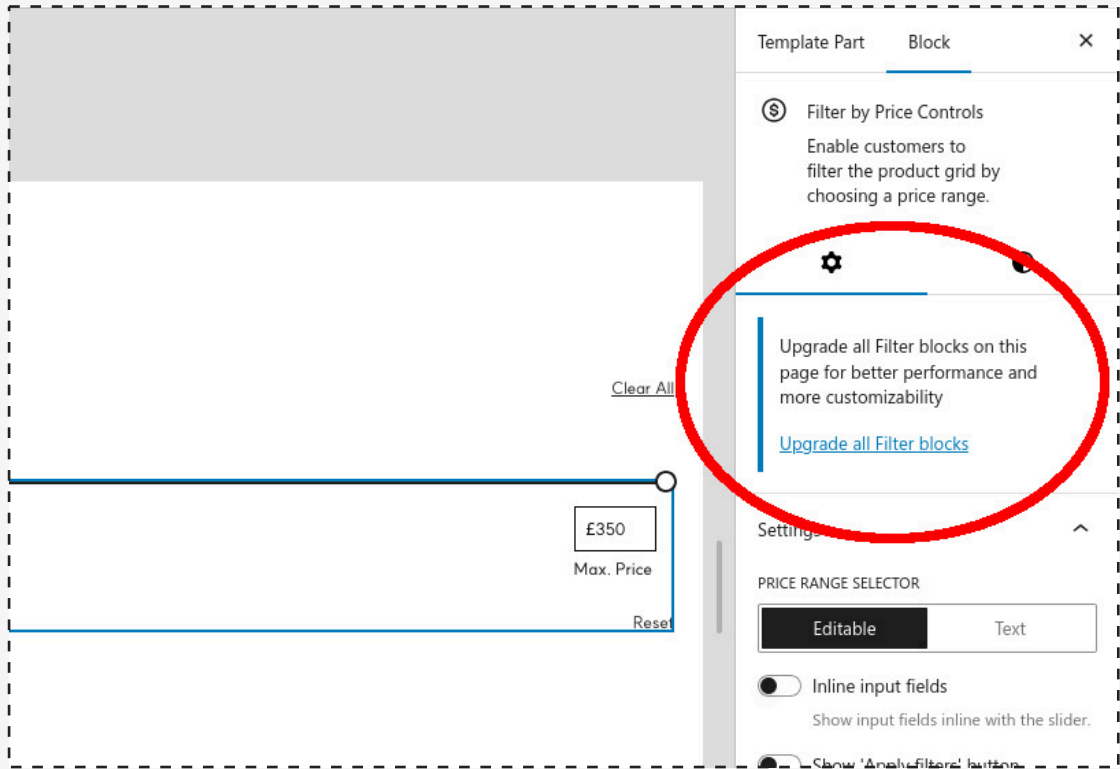

8. Select the **Filter blocks** you want to add.
9. Style the blocks using the **Settings Side Menu** on the right-hand side.
10. Click on the **Save** button in the top right corner once you're finished.

In step 7, if you don't see a selection of different **Filter blocks** after typing **"filter"** you may need to upgrade all the filter blocks to the latest version.

To upgrade the filter blocks, do the following:

1. Click on one of the **Product filter blocks**
2. Click on the **Upgrade all Filter blocks** link in the **Settings Side Menu** on the right-hand side.

## NOTE

## 2.6.1. Switching to the Classic Cart and Checkout

By default, WooCommerce uses the **Block Cart and Checkout**, but for Mizu Theme, we recommend using the **Classic Cart and Checkout**, as it is designed to fit with the rest of the theme.

To use the **Classic Cart and Checkout**, do the following:

1. Navigate to **Pages** from the **Dashboard**.
2. Hover over the **Cart** page and click on the **Edit** button.
3. Open the **Document Overview** side menu by clicking on the button with **three horizontal lines** in the top left corner of the page.
4. Click on the **Cart** block in the **Document Overview** side menu. The **Cart** block should now have a border around it with the **Block toolbar** on top.
5. Click on the **Cart icon** in the **Block toolbar**.

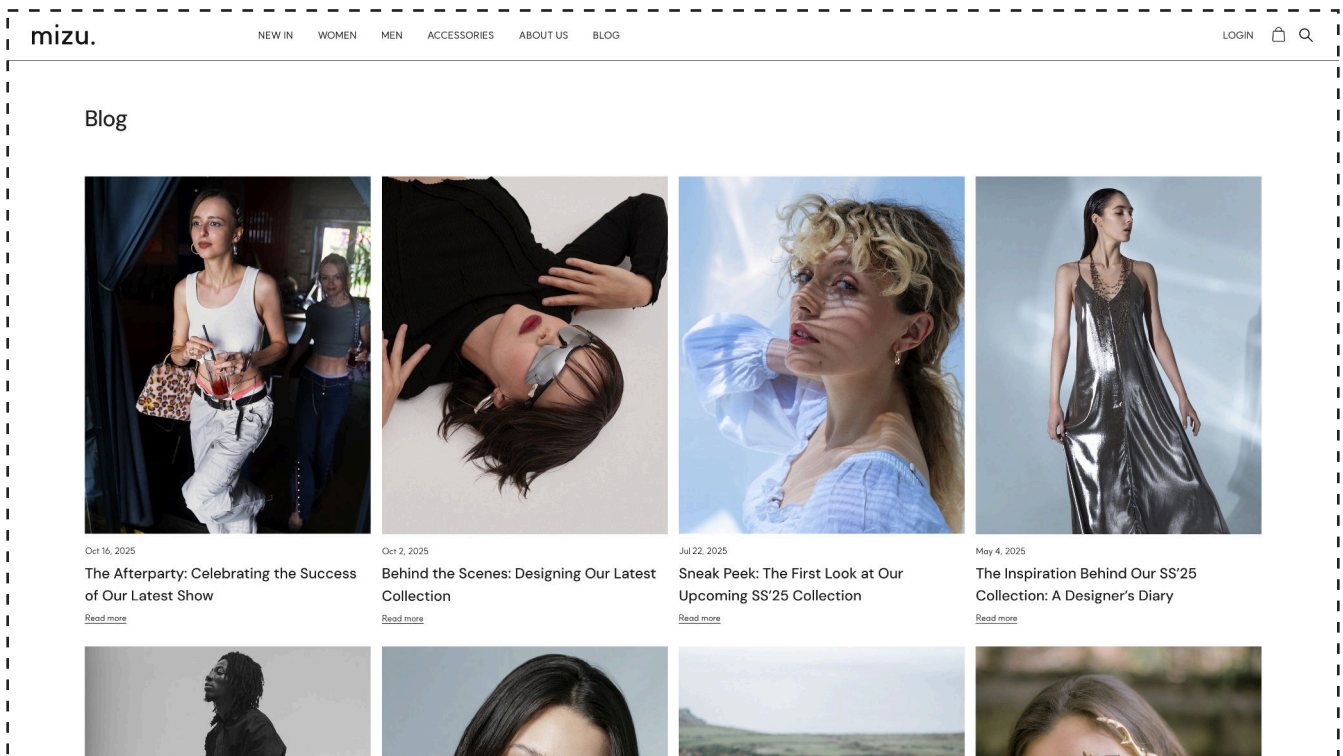

6. Select **Classic Shortcode** from the dropdown. In the **Document Overview** menu, it should now say **Classic Cart**.
7. Click on the **Save** button in the top right corner of the page.
8. Repeat steps 1-7 for the **Checkout** page.

**NOTE**

The **Classic Cart and Checkout** design is not customizable from the WordPress Block Editor. If you prefer to have a customizable alternative, you can use the **Block Cart and Checkout**.

## 2.7. The Blog Page

### 2.7.1. Configuring the Blog Page

To configure the **Blog Page**, do the following:

1. Navigate to **Pages > Add Page** from the **Dashboard**.
2. Type in a name for your **Blog Page** in the **Add title** text box, such as **"Blog"** or **"Journal"**.
3. Click on the **Publish** button in the top right corner of the screen.
4. Return to the **Dashboard** by clicking on the **WordPress logo** in the top left corner of the screen.
5. Navigate to **Appearance > Customize** from the **Dashboard**.
6. Click on the **Homepage Settings** section.
7. Ensure that the **A static page** radio button under the **Your homepage displays** label is selected.
8. Click on the dropdown under the **Posts page** label and select the page that you created in step 3.
9. Click on the **Publish** button at the top of the Customizer.

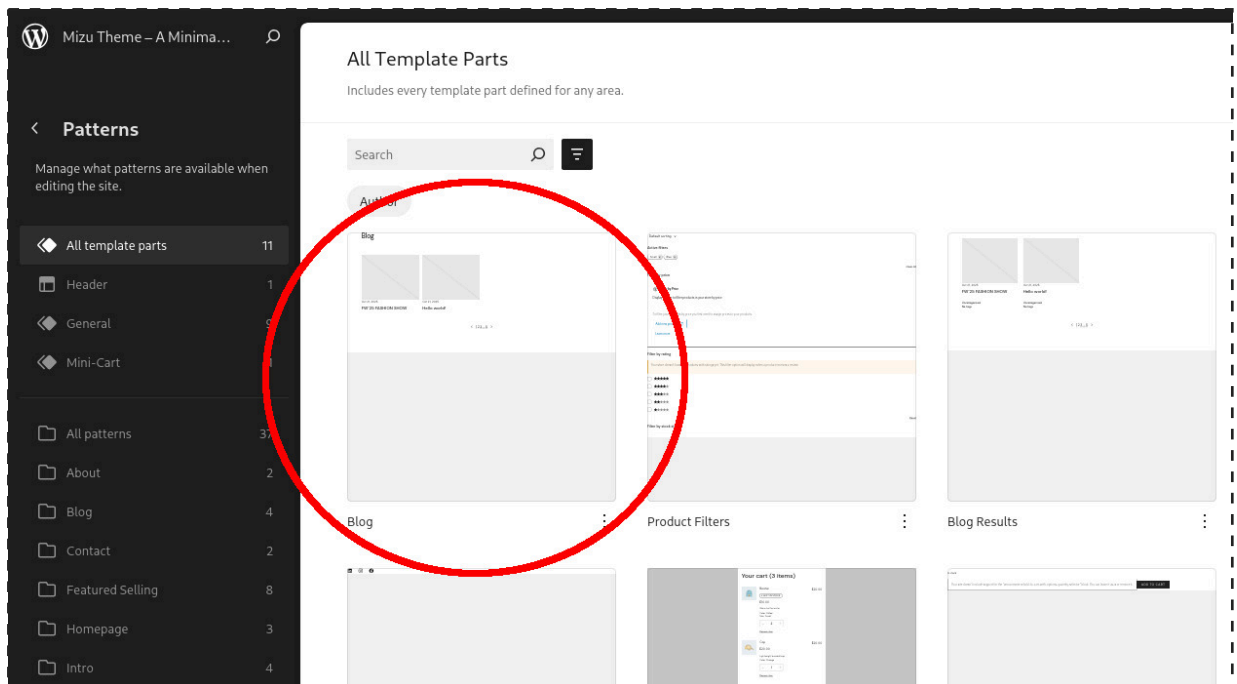

To add the blog page to one of your menus, refer to [Adding Menu Items to the](#)

## [Navigation Bar](#).

### 2.7.2. Customizing the Blog Page Design

To customize the design of the **Blog Page**, do the following:

1. Navigate to **Appearance > Design** from the **Dashboard**.
2. Click on the **Patterns** section.
3. Click on the **All template parts** section.
4. Find the **Blog** template part and click on it.

5. Customize the page to your liking using the **WordPress Block Editor**.
6. Click on the **Save** button in the top right corner once you're finished.

If you are using a search bar for blog posts on your site, make sure to copy your changes to the **Blog Results** template part as well.

### Patterns

Manage what patterns are available when editing the site.

- All template parts 11
- Header 1
- General 9
- Mini-Cart 1
- All patterns 37
- About 2
- Blog 4
- Contact 2
- Featured Selling 8
- Homepage 3
- Intro 4

## All Template Parts

Includes every template part defined for any area.

Search

Author

The screenshot shows the 'All Template Parts' interface in WordPress. A search bar at the top contains the text 'Author'. Below the search bar, there are several preview cards for different template parts. The 'Blog Results' card is circled in red. The cards are labeled 'Blog', 'Product Filters', and 'Blog Results'. The 'Blog Results' card shows a grid of placeholder images. The 'Product Filters' card shows a sidebar with filter options. The 'Blog' card shows a list of placeholder images. The 'Your cart (3 items)' card shows a shopping cart interface. The 'Intro' card shows a large placeholder image.

## 2.8. The Blog Posts

mizu. [NEW IN](#) [WOMEN](#) [MEN](#) [ACCESSORIES](#) [ABOUT US](#) [BLOG](#) [MY ACCOUNT](#) [🛒](#) [🔍](#)

### Shooting Our Lookbook: A Day in the Life on Set

Discover the perfect harmony between fashion and nature with our latest collection, where every piece is inspired by the breathtaking beauty of the outdoors. From earthy tones and lush greens to vibrant floral prints, our trendy clothing seamlessly blends nature's palette with modern style.

Whether you're wearing statement tees with bold prints, rugged eco-friendly fabrics, or accessories reminiscent of forest foliage, our collection encourages you to express your love for the environment while staying chic. Designed for those who value sustainable fashion without compromising on style, our collection celebrates the wilderness and your unique fashion sense—so step outside, breathe in the inspiration, and let your wardrobe flourish with the finest elements of the outdoors.

### 2.8.1. Creating a Blog Post

Mizu Theme currently offers two **Blog Post Patterns**:

- **Blog Post 1** - A full width layout.
- **Blog Post 2** - A partial width layout.

To use one of the available patterns, do the following:

1. Navigate to **Posts > Add Post** from the **Dashboard**.
2. Type in a title for your new post in the **Add title** text box.

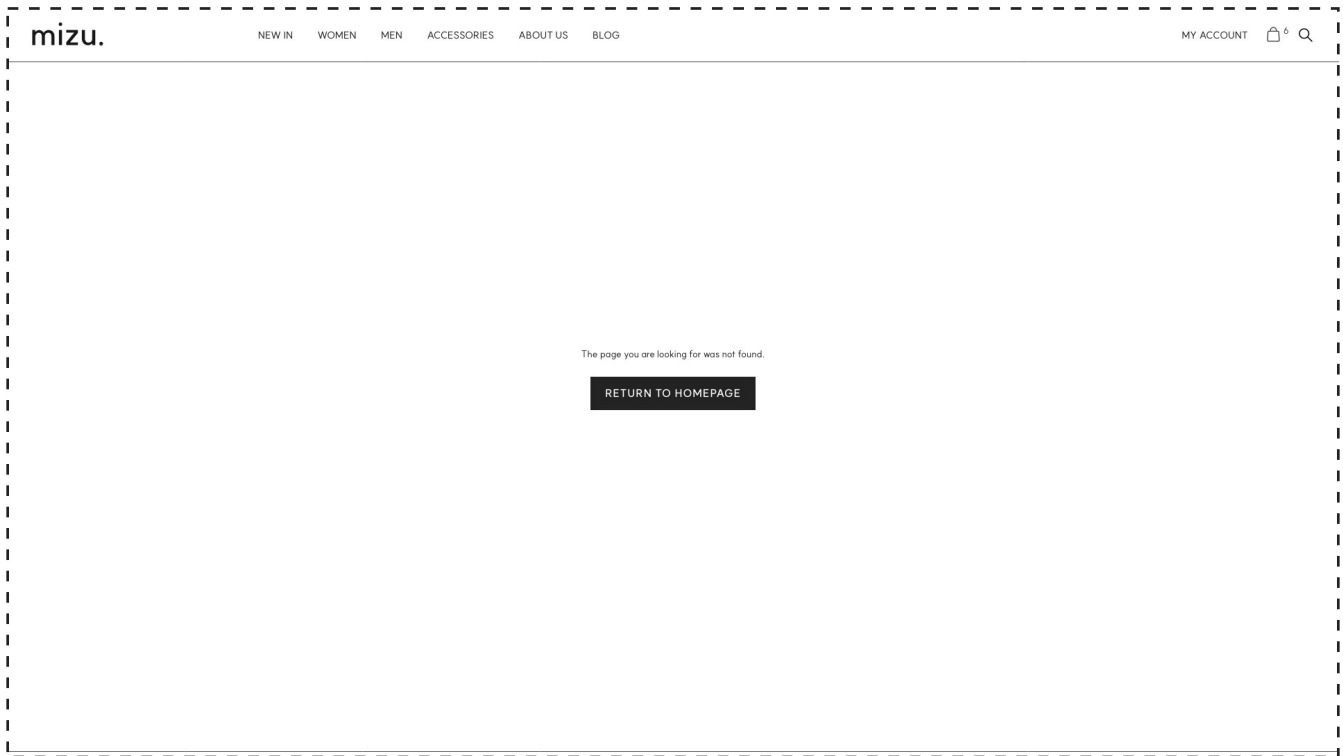

3. Click on the **+ icon** in the top left corner.
4. Navigate to the **Patterns** tab.
5. Type in **"blog post"** in the **Search field**.
6. Select either **Blog Post 1** or **Blog Post 2**. The blog post pattern you select will be inserted into your new post.

7. Customize the page to your liking using the **WordPress Block Editor**.
8. Click on the **Publish** button in the top right corner once you're finished.

You can find more information about how to use the **WordPress Block Editor** here: [WordPress Editor Tutorial](#).

## 2.9. The 404 Page

### 2.9.1. Adding WordPress Blocks and Widgets to the 404 Page

To add WordPress **Blocks** and **Widgets** to the **404** page, do the following:

1. Navigate to **Appearance > Widgets** from the **Dashboard**.
2. Locate the **404 Page** section and click on it.
3. Click on the **+** button.
4. Select the **block** you want to add.
5. Click on the **Update** button in the top right corner once you're finished.

#### NOTE

To use **Gutenberg Blocks** instead of **Legacy Widgets**, make sure that the **Classic Widgets** plugin is **Deactivated**.

## 2.10. Fonts

Mizu Theme gives you the option to apply **two fonts** to your site, one font for headings and one font for content.

For these next steps, you will need to have your font files ready so that you can upload them to your site. **Mizu Theme** works with both static and variable fonts.

### 2.10.1. Changing the Font on Your Site

By default, **WordPress** does not allow users to upload font files, so you will need to install a **font uploader plugin**. We recommend installing the [Custom Fonts](#) plugin.

Once you have installed and activated the **Custom Fonts** plugin, you can change the fonts on your site by doing the following:

1. Navigate to **Appearance > Customize** from the **Dashboard**.
2. Click on the **Fonts** section.
3. To upload a **heading font**, click on the **Select file** button below the **Heading Font** label and upload your desired font. You can upload either a static or variable font.
4. To upload a **content font**, either upload a single **variable font** using the **Content Variable Font** field, or upload a **static font** for each font weight using the **Content Static Font** fields.
5. To add a **Fallback Font**, type in the name of a web-safe font under **Heading Fallback Font**. Then do the same for the **Content Fallback Font**.
6. Click on the **Publish** button at the top of the Customizer once you're finished.

**NOTE** If you don't see your changes, you may need to **refresh** the page.

## 2.11. Page Templates

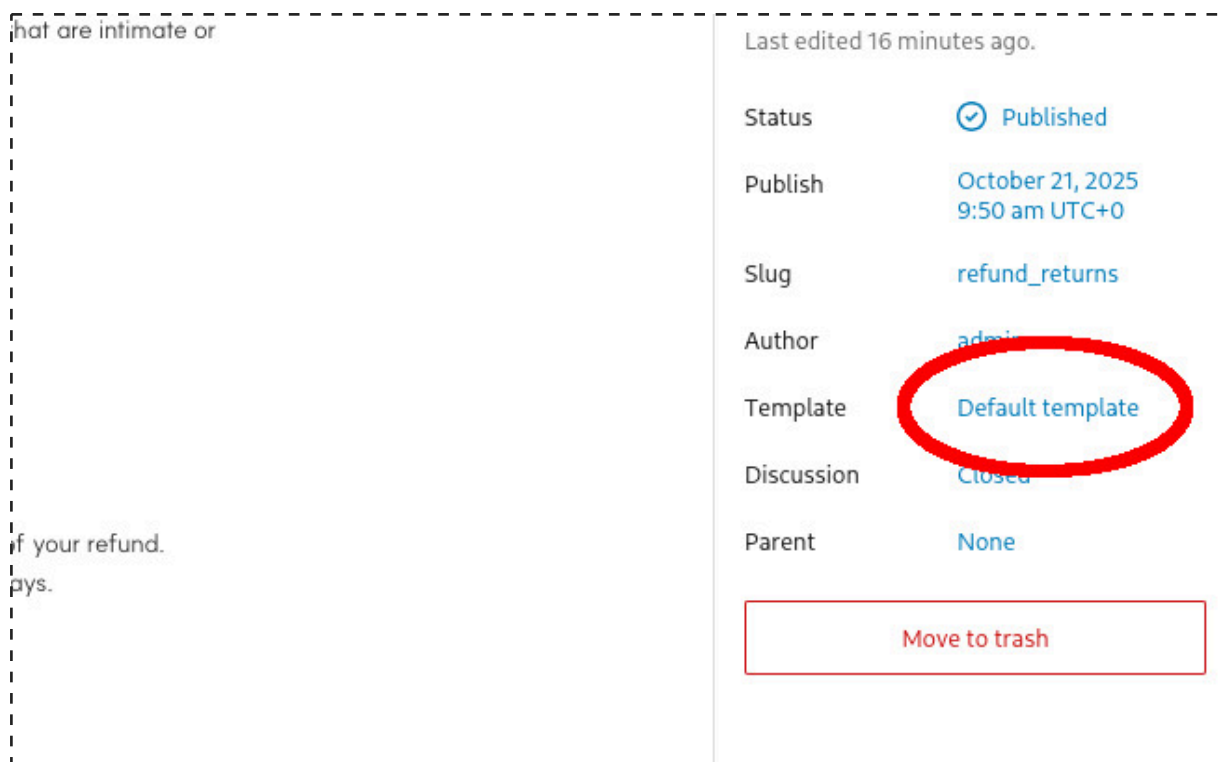

### 2.11.1. Changing the Layout of Your Pages

Mizu Theme provides six page layouts:

- Full width (with title)
- Full width (no title)
- Medium container (with title)
- Medium container (no title)
- Small container (with title)
- Small container (no title)

To change the layout of one of your pages, do the following:

1. Navigate to **Pages** from the **Dashboard**.
2. Hover over the **Page** you want to edit and click on the **Edit** button.
3. Navigate to the **Page** tab in the **Settings menu** on the right.
4. Locate the **Template** field and click on the **blue text** next to it.

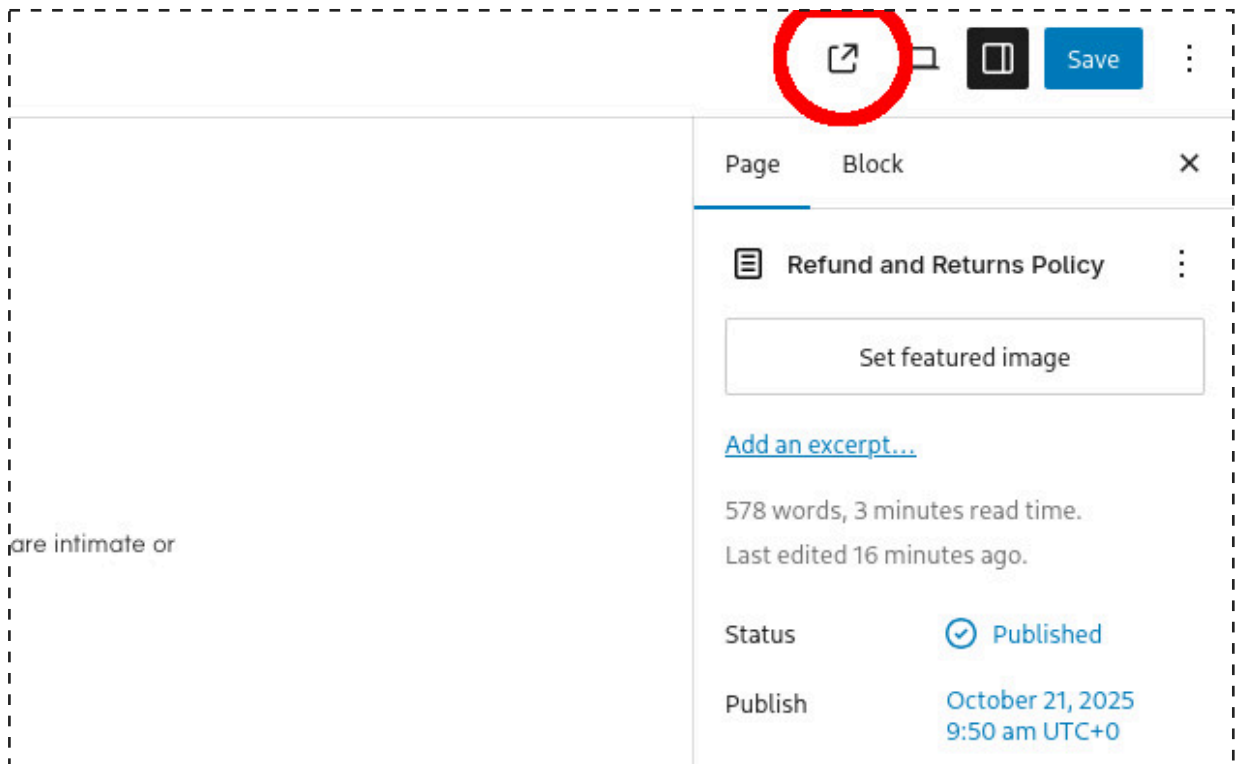

The screenshot shows a page settings interface. On the left, there is a large text area with a dashed border containing the text "that are intimate or" at the top and "if your refund. pys." at the bottom. On the right, there is a settings panel with the following fields and values:

- Last edited 16 minutes ago.
- Status: Published (with a checkmark icon)
- Publish: October 21, 2025 9:50 am UTC+0
- Slug: refund\_returns
- Author: admin
- Template: Default template (this text is circled in red)
- Discussion: Closed
- Parent: None

At the bottom of the settings panel, there is a red-bordered button labeled "Move to trash".

5. Select the **Template** you want to use from the dropdown menu.

6. Click on the **Save** button in the top right corner of the page.
7. Click on the **View page** button in the top right corner of the page to view the changes.

## 2.12. Translations

### 2.12.1. Adding Translations for Your Language

Mizu Theme comes with translation files for the following languages:

- Catalan
- Chinese (Taiwan)
- Czech
- Dutch
- Dutch (Formal)
- French (France)
- German
- German (Formal)
- Greek
- Hebrew
- Hungarian
- Indonesian
- Italian
- Polish
- Portuguese (Brazil)
- Portuguese (Portugal)
- Russian
- Spanish (Colombia)
- Spanish (Spain)
- Spanish (Venezuela)
- Swedish
- Turkish

Each of these files are only partially translated, so you will need to install a translation plugin (such as [Loco Translate](#)) to add any missing translations.

If your language is not listed above, you can also use the **Loco Translate** plugin to create a translation file for your language.

## 2.12.2. Adding a Language Switcher to Your Store

By default, WordPress does not support multiple languages in a single store, so if you want to add a **Language Switcher** to your store, you will need to install a plugin.

The **WordPress Plugin Directory** has many multi-language plugins to choose from, but we highly recommend [TranslatePress](#).

# 3. Support

We hope that this documentation has been useful in helping you to set up your store. If you have any questions, we are always happy to help! :)

## 3.1. Feature Requests

If you have any ideas about useful features that you want us to add to **Mizu Theme for Luxury Fashion**, please feel free to submit a feature request.

[Submit a Mizu Theme for Luxury Fashion Feature Request](#)

## 3.2. Bugs and Fixes
